«Ashraf al-Qudra, portavoce del Ministero della Sanità, ha detto lunedì che dozzine di corpi rinvenuti nelle fosse comuni sono stati decapitati e sono stati rimossi gli organi e la pelle».

L'IRNA (Iran Republic News Agency), organo di stampa del governo di Teheran, ha riportato un dettaglio agghiacciante sui terribili crimini di guerra commessi dalle forze di difesa israeliane.

Israele non indagherà sulle fosse comuni trovate negli ospedali di Gaza, poiché si è già occupato della questione e non ha riscontrato alcun illecito da parte delle sue truppe, ha detto a Politico un portavoce delle Forze di difesa israeliane (IDF), diffondendo un'ondata di bugie appoggiate dal governo. Giornale di New York che sostiene i democratici e i sionisti

Il portavoce dell'IDF Nadav Shoshani ha detto venerdì a Politico che le notizie secondo cui le truppe israeliane avrebbero qualcosa a che fare con le sepolture di massa erano *“notizie false”*. Quando gli è stato chiesto se ciò significasse che Israele non avrebbe indagato sulla questione, ha risposto: *“Indagare su cosa?”*

Il consigliere per la sicurezza nazionale degli Stati Uniti, Jake Sullivan, ha dichiarato mercoledì che Washington vuole vedere le circostanze relative alle centinaia di morti *“indagate in modo approfondito e trasparente”*.

Il Terribile Traffico di Organi Umani di Israele

«I medici e gli operatori di soccorso coinvolti nella rimozione dei corpi di civili da una fossa comune scoperta presso il Nasser Medical Complex nella città di Khan Younis nella Striscia di Gaza hanno segnalato la scoperta di segni che indicano la rimozione di organi interni dal defunto. Questa informazione è stata fornita dall'agenzia palestinese Wafa» ha aggiunto Russia Islamic World.

This disturbing news was almost ignored by Western media despite its importance. Because has confirmed the suspicions that the Zionist regime of Benjamin Netanyahu since many years use the war against Gaza Strip not only to conquer it through a systematic depopulation for aiming the foul project of “Great Israel” and for seizing the Marine Gaza rich gas deposit **but even for supplying the Western Black Market of human organs.**

Some months ago we published on Gospa News a detailed investigation on this awful business in the Israeli military operations against Hamas. Now comes the confirmation.

*«According to Wafa, **some bodies were found with their hands tied and their abdominal cavities sewn up, raising suspicions of organ theft.** The bodies were wrapped in black and blue shrouds made of plastic and nylon, which differ in color from the shrouds typically used in Gaza. Emergency officials believe this may have been done to raise the temperature of the bodies, speeding up the decomposition process and concealing evidence. The agency also notes that some of the bodies showed signs of gunshot wounds to the head»* Russia Islamic World detailed.

The discovery of mass graves on Saturday, and continuing into Sunday and Monday, came weeks after the Israeli military pulled out from Khan Younis on April 7. Much of the southern Gaza city is now in ruins following months of relentless Israeli shelling.

A body nude and handcuffed inside the Khan Younis mass grave

Following the Israeli withdrawal, Palestinian emergency services recovered the bodies of 392 individuals from their graves. Buried more than three meters deep, the bodies were stacked on top of each other. **Videos and photographs published later showed signs of torture on some of the bodies. Additionally, some of those buried were found handcuffed with plastic restraints.**

Another mass grave near al-Shifa hospital

Last week, a new mass grave was discovered at al-Shifa Hospital following a two-week siege by Israeli forces. Several other mass graves had earlier been found at the hospital, the largest medical complex in Gaza.

«Al-Qudra confirmed that similar atrocities have taken place in other hospitals across Gaza, including at Kamal Adwan, al-Quds, and al-Amal hospitals, which were “invaded and destroyed” by the Israeli occupation»IRNA highlighted

The Israeli regime has frequently targeted civilian buildings like hospitals in Gaza to cripple the enclave’s ability to provide life-saving services to its besieged population. More than 34,000 Palestinians have been killed since early October when the war began.

The Human Organ Market in other NATO Wars

Already during the Syrian Civil War the White Helmets (Syria Civil Defence) have been accused by Russia before UN of the same human organs’ traffic. White Helmets were financed by UK-US and trained by a former British military intelligence officer who later mysteriously died in Istanbul after the invasion of the Turkish army in Rojava, the Syrian north-east controlled by the Kurds).

Spokeswoman of Russia Foreign Ministry Marija Zacharova blamed Ukraine, another NATO protectorate, of the same chilling business. Russian Army’s soldiers found found an horrific factory to raise children for prostitution and organ harvesting.

These are the Western countries where, with the excuse of exporting democracy, the not-so-occult powers are installing the dictatorships of the New World Order of Masonic and Nazi-Zionist origin.

PS Thanks to VT Russian Reader Andrew Armavir for suggestion of this investigation in his comment below an article of mine.
