Regional Context

The West Bank Barrier

A complex series of concrete walls, electronic fences, and other obstacles to control Palestinian pedestrian and vehicular movement. Construction of the Barrier within the West Bank including East Jerusalem continues, contrary to the advisory opinion of the International Court of Justice.

BARRIER GATE - Controls movement through the West Bank Barrier. Permits, or prior coordination, are required for Palestinians to access their lands.

Closure

A policy of physical barriers, permit requirements and other administrative restrictions used to control Palestinian pedestrian and vehicular movement.

CHECKPOINT - A barrier staffed by the Israeli army and/or Border Police with observation towers and/or other physical structures used to control Palestinian and vehicular access.

PARTIAL CHECKPOINT - An established checkpoint operating periodically.

OBSERVATION TOWER - An elevated military tower to monitor/control Palestinian pedestrian and vehicular access.

EARTH MOUND - A mound of rubble, dirt and/or rocks used to obstruct vehicle access.

TUNNEL - An underpass for Palestinian vehicles located beneath a West Bank road primarily for Israeli settler use.

ROADBLOCK - A series of 1 metre concrete blocks used to obstruct vehicle access.

TRENCH - A ditch used to prevent vehicles from crossing.

ROAD GATE - A metal gate, often manned by the Israeli army, used to control movement along roads.

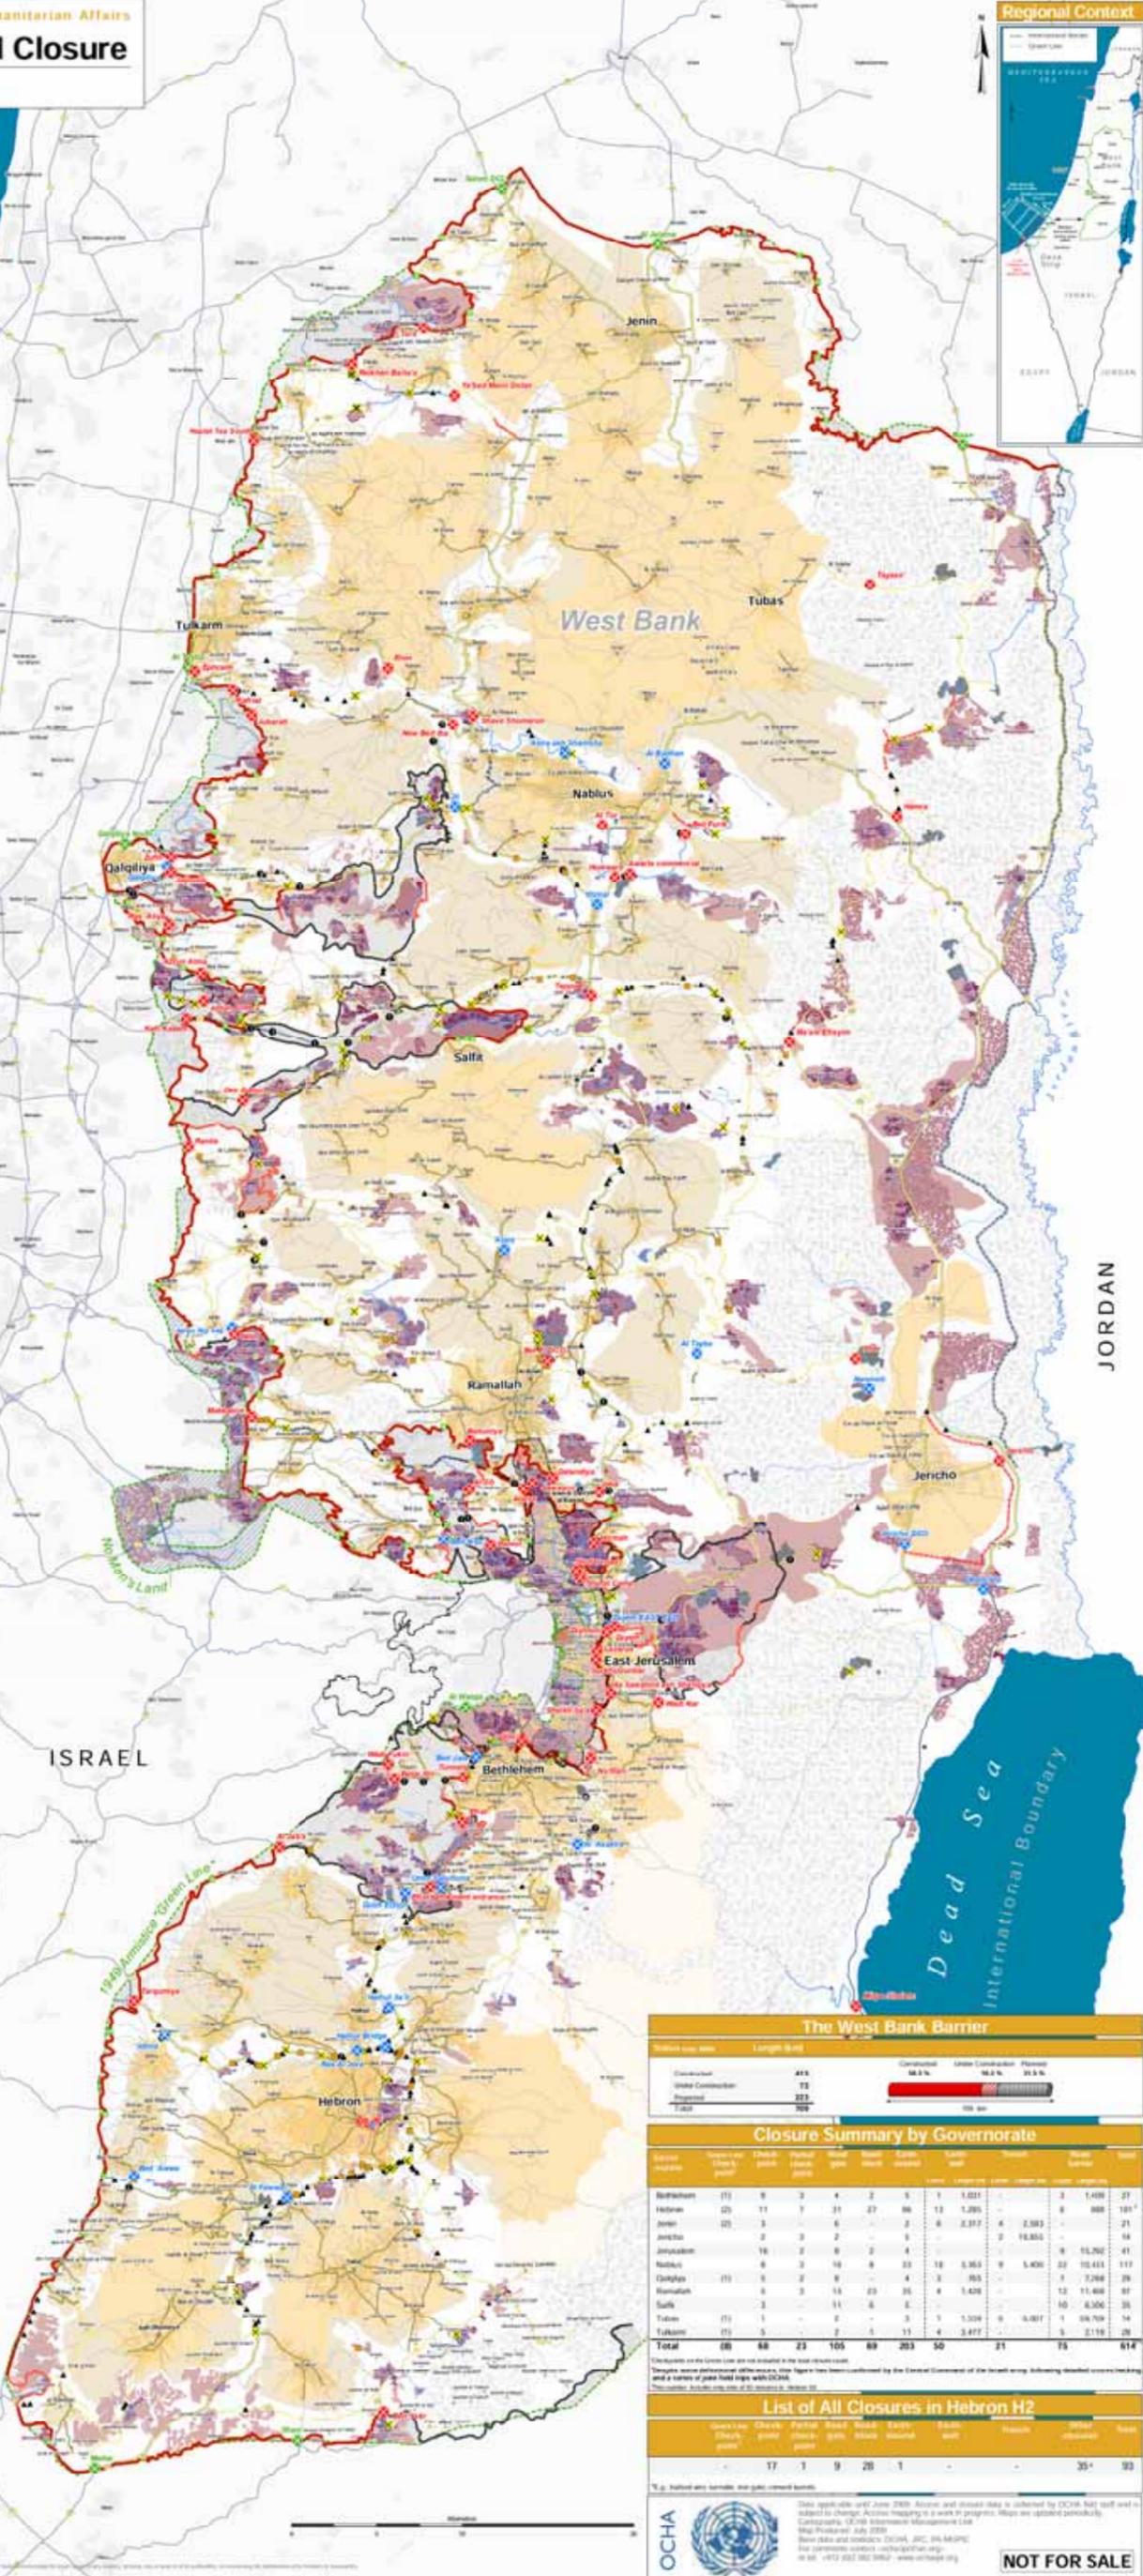

ROAD BARRIER - Continuous fencing along roads which prevents Palestinian vehicular, agricultural and pedestrian access to roads used by Israeli settlers.

The Permit System

Palestinians are required by the Israeli army to obtain various permits to facilitate movement through checkpoints to reach East Jerusalem and other West Bank areas including those located between the Barrier and the Green Line. Permit types vary depending on location, person and purpose.
