Voci: l'imminente attacco israeliano contro l'Iran (molto presto) è inevitabile

<https://www.zerohedge.com/geopolitical/massive-armada-irgc-boats-mobilize-gulf-amid-rumors-israeli-strike-imminent>

Preparazione attraverso fake news:

“ Israele / Stati Uniti hanno ricevuto informazioni che l’Iran testerà una bomba nucleare sotterranea nelle prossime settimane.

C’è molto caos dietro le quinte mentre Israele dichiarerà il testare la sua linea rossa, ma l’amministrazione statunitense uscente non vuole avere nulla a che fare con la risposta. Pertanto, l’Iran ha scelto questo particolare periodo di tempo.

“Israele ha ucciso Fakhrizadeh per cercare di ritardare il processo. L’amministrazione israeliana non si aspetta aiuto dagli Stati Uniti (a causa del momento in cui ciò accade), ma è completamente pronta a farlo da sola.

“Dopo una riunione del governo iraniano, l’Iran ha affermato di aver preso una decisione sulla vendetta e sulla punizione severa, ma non ha detto contro chi”.

Tenete sotto controllo questo molto, molto da vicino nelle ore e nei giorni a venire. **Ciò che accade rischia di trasformarsi in una situazione disastrosa per tutto il mondo** quasi immediatamente.

Gli Stati Uniti riportano il gruppo d’attacco della portaerei USS NIMITZ indietro nel Golfo Persico.

Come tutti sanno, in un vero conflitto una portaerei dura pochi minuti. Poi viene affondata da missili o siluri nemici coi 5 mila uomini di equipaggio.

I MAS iraniani durante un'esercitazione.

La portaerei *Nimitz* si trova esattamente nella condizione in cui erano le Twin Towers : è decrepita, le spese di manutenzione sono aumentate fino a diventare insostenibili; andrebbe smantellata ma, come le Twin Towers, lo smantellamento ordinato e “pulito” nel senso sanitario-ecologico sarebbe stato ancor più costoso, basti pensare all’amiante da togliere prima dell’abbattimento; per la *Nimitz* si pensi al motore nucleare, il cui smaltimento è un problema insolubile.

Dunque un affondamento della *Nimitz*, di cui si possa dare la colpa all’Iran, l’Amalek, darebbe l’occasione migliore per scatenare la guerra (atomica) contro Teheran, e insieme la perfetta ragione “economica” per il suo disposal senza spese. E il motore nucleare nel fondo del Golfo Persico invece che nel cantiere americano, è cosa ottima.

E il petrolio e il gas non arriveranno più agli europei, o saranno molto rincarati

Massive Armada Mobilize In Gulf Amid Rumors Israeli Strike Imminent

Massive Armada Of IRGC Boats Mobilize In Gulf Amid Rumors Israeli Strike Imminent

0 [zerohedge.com/geopolitical/massive-armada-irgc-boats-mobilize-gulf-amid-rumors-israeli-strike-imminent](https://www.zerohedge.com/geopolitical/massive-armada-irgc-boats-mobilize-gulf-amid-rumors-israeli-strike-imminent)

The naval forces of the Iranian Revolutionary Guard Corps (IRGC) on Thursday conducted large-scale exercises in the Strait of Hormuz **at a moment Tehran believes Israel will launch a preemptive strike aimed at drawing Trump into ordering US military action** in the region before he leaves office in January.

Via IRNA/Press TV

According to state-run English language *PressTV*, "The event saw sailors, enlisted with the popular volunteer Basij force, taking to the waters aboard **more than 1,000 light and semi-heavy-lift vessels.**"

Photos showed an impressive number of small but fast military boats that are typically used by the IRGC Navy (which is separate from the much larger national navy of the Islamic Republic) to harass and encircle larger ships, whether tankers or foreign warships.

Via IRNA/Press TV

IRGC Admiral Ali Reza Tangsiri, who oversaw the maneuvers, called it a display of strength and a showcasing of Iran's "maritime power" which provides security in the Arabian and Oman Seas.

Crucially the 'show of force' comes amid widespread reports that Trump is mulling some kind of preemptive action against either Iran or its regional allies, such as the powerful Shia militias in Iraq.

Earlier this month *The New York Times* reported that Trump's advisers talked him down from ordering a strike, which **they argued would certainly spiral into a larger war**.

Included in the "strike options" were most likely **plans to hit the Natanz enrichment facility**, according to the report, which suffered sabotage and damage last summer in a likely Israeli covert operation but which is being repaired and rebuilt.

Israel too is said to be preparing for such a scenario, with its armed forces said to be in a high state of readiness. Iran is apparently taking these reports very seriously.

America's "stability promotion" works in mysterious ways...

(The US - and the region - would be better off if the US simply didn't...)

In threat to Iran, US sends heavy bombers to Middle East via Israel

Axios reported Wednesday based on unnamed senior Israeli sources:

The Israel Defense Forces have in recent weeks **been instructed to prepare for the possibility that the U.S. will conduct a military strike against Iran before President Trump leaves office.**

SCOOP: Israeli military prepares for possibility Trump will strike Iran

<https://t.co/uwtCDmRKxW>

— Axios (@axios) November 25, 2020

Middle East war correspondent for *Al Rai Media*, Elijah Magnier has cited unnamed Iranian military sources who say they believe Israeli leaders are planning to create a "pretext" designed to trigger US intervention just weeks before the inauguration of Joe Biden:

In an unprecedentedly high level of military readiness, the "Axis of the Resistance" led by Iran has declared a maximum alert on all fronts, as a **preparation for a possible battle or war breaking out in the Middle East prior to the arrival in office of President-elect Joe Biden.**

Sources within the "Axis of the Resistance" say that "the US may not be planning for a war against Iran with President Donald Trump leaving office soon. However, it is not excluded that the "bully of the neighborhood", Prime Minister Benjamin Netanyahu, would like to carry out a swift hit on the Iranian nuclear facilities in order to sabotage the nuclear deal ready for when Biden takes over. **In the case of an Israeli bombing followed by an Iranian retaliation, the Trump administration can then intervene with the pretext of "defending" Israel.**

This means that it's more than likely we'll see Iran ramp up its military exercises and shows of strength as the weeks wind down on the Trump presidency.
